PROFESSIONAL SKIN CARE

MESOPHARM PROFESSIONAL

Since 2001 Mesopharm has been working to provide cosmetologists with products they can trust. While teaching invasive methods to specialists and developing mesotherapy products we realized that there are no Russian salon-oriented cosmetics that are proven to be effective and share our views on professional skin care. That's why we created Mesopharm Professional cosmetics in 2010.

PRINCIPLE

We use active ingredients and botanical extracts only if their effectiveness is proven by research.

MISSION

Our products help skin to work itself, to reveal its hidden potential, to launch the process of renewal and preserve its health and youthfulness.

RULES

We never use aggressive ingredients or synthetic chemicals. We have chosen high quality natural and organic ingredients of the best international producers.
