+ **Hair X Lotion** daily

**Hair X (Peptide)**  
5 procedures once in 7 days

**80%** of the patients notice reduction in hair loss after 4 weeks of use

## PATIENTS' FEEDBACK

Thanks to the course treatment I finally got rid of seborrhea, hair loss stopped, hair quality and growth significantly improved. I am very thankful to my doctor for the recommendations, during the course I realized how important daily homecare is.

”

It feels like my hair became thicker and started to grow faster. Now there is less hair left on the comb. New fluffy hair appeared in the temporal area.

”

The hair quality and scalp condition have not changed, but there is a feeling of more hair, it became more voluminous. I will definitely undergo trichological procedures regularly!

”
