

POLYWRAP PRIMER

Description:

Petrolatum based primer for application on metal surfaces prior to wrapping with PolyWrap Anti Corrosion Tape.

Use:

PolyWrap Primer acts as a bonding agent by displacing excess moisture on metal surfaces prior to wrapping with PolyWrap Anti Corrosion Tape. PolyWrap Primer can be applied in wet environments on new or corroded surfaces.

PolyWrap is not recommended where exposure to strong solvents is likely.

Temperature:

Withstands temperatures (-5) Deg. C to (+60) Deg. C.

Color:

Brown

APPLICATION INSTRUCTIONS:

Remove loose dirt and contaminants using a wire brush. Eliminate all sharp edges and welding splatter.

PolyWrap Primer can be brushed or ragged on with a thin, uniform coat. Utilize heavier application on pitted areas, bolt heads, or any other contoured or sharp surface.
